WINE EXPORT SPAIN

— THE JOY OF WINE —

Flexitank Fact Sheet

BULK LIQUIDS DIVISION

- ✓ Over 20 years of experience with Flexitanks and Isotanks.
- ✓ Vast experience in chemical-grade and food-grade cargo.
- ✓ A commercial and operational team specialized in transporting bulk liquids.
- ✓ A network of international agents who are specialized in handling Flexitanks.

High Quality Flexitanks + Specialized Logistics Agents = A SUCCESSFUL OPERATION

FLEXITANK

- ✓ Flexitanks offer a safe, efficient, and economic way for transporting bulk liquids.
- ✓ Flexitanks allow us to transport up to 24,000 liters (6,340 gallons) of non-hazardous goods within a 20' container, which significantly reduces operation costs.
- ✓ TIBA insists on strict controls for Flexitank providers and installers. We ensure the highest quality and audit certifications and insurance for manufacturers and installers.
- ✓ We offer the Flexitank model that best meets the individual needs of our customers each and every time.

FLEXITANK CHARACTERISTICS

Food-grade Flexitanks

- ✓ Flexitanks are made with 100% virgin polyethylene, which fulfills all requirements and standards for both the FDA and the EU -Regulator and Food Contact Regulations.
- ✓ Flexitanks for transporting wine have the lowest Oxygen Transmission Rate (OTR) on the market.

Safe and Reliable

- ✓ Flexitanks have a high-density inside lining that is strong enough to protect and maintain the product without any risk.
- ✓ A protective rod offers additional support to the container's doors, which guarantees total security, even when the container is in transit.

FLEXITANK CHARACTERISTICS

Easy to Use

- ✓ Flexitanks have a 3" cam-lock valve that is specially designed to easily draw the product inside the bag and aid in discharge. This eliminates leaks and/or a loss of product.

International Service

Our international network of agents allows us to offer comprehensive services including:

- ✓ Container selection and preparation.
- ✓ Flexitank installation.
- ✓ Loading supervision.
- ✓ Domestic ground transport and international sea freight.
- ✓ Unloading supervision at the destination.
- ✓ Flexitank bag and installation material disposal through a recycling system.

FLEXITANK CHARACTERISTICS

Environmental Protection

- ✓ Flexitanks, along with its installation materials are 100% recyclable, which allows us to reduce our environmental footprint.
- ✓ Technological advances (R&D) allow us to offer a much more competitive Flexitank in price as well as in **quality**.
- ✓ Our investment in research, development, and innovation throughout the past few years allows us to offer our clients a more competitive Flexitank.

TYPES OF FLEXITANKS

1. Standard (For wine and other products)

2. Dual-compartment Flexitanks (two different products in the same flexitank)

TIPOS DE FLEXITANQUES

3. Flexitank with an integrated heating system.

4. Flexitanks for 40' dry reefer containers as well as for truck transport.
